CONTROL THE PROJECT. TRANSFORM THE IMAGE.

Professional documentation system for controlled AI-assisted architectural visualization.

INCLUSION · Professional

EN MASTER · ES/PT REFERENCE · MAXIMUM PRESERVATION COMPATIBLE WITH MODEL + INPUT

Your route

Tu recorrido / Seu percurso

PACK RULE Open the primary resources in the exact numeric order used in the delivery folder. Each main resource appears once in this route. Prompt libraries, editable forms and optional support resources should be opened only when required by the workflow. Apply optional resources only after the base result has been reviewed and approved.

NO.	PHASE	PRIMARY RESOURCE	APPLICATION
01	ORIENT	START HERE	Understand the pack structure, file hierarchy and recommended workflow.
02	PREPARE	Professional User Manual + Prompt Selection Matrix	Review the operating method and select the correct prompt or workflow for the project.
03	BUILD	CORE Prompt Library · 11	Create the base result using the essential architectural visualization workflows.
04	SPECIALIZE	Professional Prompt Library · 45 + Preservation Modules · 6	Use a specialized workflow and add preservation controls when greater precision is required.
05	HUMANIZE	Humanization Library · 10	Add approved human activity only after architecture, camera and the base result are approved.
06	CONTROL	LOCK Method	Protect immutable source elements and prevent unauthorized changes.
07	CORRECT	RESCUE Manual	Correct geometry, camera, material, scale or unintended modification failures.
08	MANAGE	Professional Client Kit + Editable Forms	Record references, approvals, requested changes, responsibilities and delivery decisions.
09	ADAPT	Platform Adaptation Notes	Transfer the workflow between supported image-generation platforms without losing control logic.
10	DOCUMENT	Project Consistency Workbook + Case Study Workbook	Register settings, results, decisions, series consistency and project evidence.
11	VERIFY	License and Responsible Use + Changelog and Update Policy	Confirm permitted use, version status and update conditions before final delivery or commercial use.

First controlled result

Primer resultado controlado / Primeiro resultado controlado

1. Record the source and objective in Matrix.
2. Choose CORE for speed or PRO for deep control.
3. Approve the base before HUM extensions.
4. Record the result in the Project Workbook and run LOCK/RESCUE QA.

LANGUAGE POLICY EN MASTER is the operational copy/paste text. ES and PT are reference translations. Prompts define a control objective, not a guaranteed result; verify geometry, camera, materials, light, scale, context and artifacts before delivery.
