CONTROL THE PROJECT. TRANSFORM THE IMAGE.

Professional documentation system for controlled AI-assisted architectural visualization.

INCLUSION · Starter

EN MASTER · ES/PT REFERENCE · MAXIMUM PRESERVATION COMPATIBLE WITH MODEL + INPUT

10-minute operating card

Tarjeta operativa de 10 minutos / Cartão operacional de 10 minutos

WHAT THIS PACK ADDS CORE 11 + RESCUE Quick: the shortest route from one source to one controlled result.

1. Attach one clean source and define one objective.
2. Open Core 11 and select one matching prompt.
3. Copy EN MASTER only; change one variable at a time.
4. Generate one test and compare camera, geometry and materials.
5. If a local defect remains, use RESCUE Quick; otherwise approve.

RELEASE GATE Do not deliver if camera or architectural geometry changed.

LANGUAGE POLICY EN MASTER is the operational copy/paste text. ES and PT are reference translations. Prompts define a control objective, not a guaranteed result; verify geometry, camera, materials, light, scale, context and artifacts before delivery.
